

CAREER & TECHNICAL AWARD SCHOLARSHIP

DOYON
FOUNDATION

CAREER & TECHNICAL EDUCATION DEFINITION:

We define Career & Technical Education (CTE) as an educational model that aligns education with labor market demand. It equips students with the technical, academic, and employability skills necessary for success. Completing a CTE program should result in marketable skills in a career field and the attainment of a certifiable qualification. As a result, we will no longer fund personal growth, professional development, or other courses that do not align with this definition. We may request a syllabus or course outline to help us determine whether the course aligns with our policies.
